Developing and Delivering Gender-based Violence Training for GOAL Field Teams supporting Refugees from Nomadic Cultural Background and those Engaged in Seasonal Agricultural Labor

1. INTRODUCTION

GOAL is an international emergency and development NGO dedicated to alleviating the suffering of the poorest and most vulnerable. GOAL was established in 1977 and is currently operational in 14 countries world-wide. GOAL has been working in Syria since 2013, responding to the acute needs of conflict-affected communities. GOAL has been contributing to the urban refugee responses in Turkey since 2016 with a focus on responding to needs in health service delivery and protection of vulnerable and marginalized refugees in southern Turkey.

GOAL Turkey has been implementing an ECHO funded protection program (LINK), LINK aims to connect vulnerable and marginalized communities to available state and non-state services in Adana, Gaziantep, Mersin and Şanlıurfa using outreach, advocacy, and Individual Protection Assistance (IPA) approaches. In all locations, the program particularly targets refugees from nomadic/semi-nomadic backgrounds including Dom and Abdal communities and refugees engaged in seasonal agricultural labouring along with other vulnerable refugees.

Majority of GOAL’s beneficiaries are composed of women and girls. Gender-based violence is widespread but generally underreported topic among the target groups. There is a general lack of knowledge and awareness about women’s rights, GBV-related issues, and protection mechanisms. GOAL protection teams often identify and refer cases, provide legal and psychoeducation sessions on GBV. To further deepen the technical capacity of field teams, GOAL seeks consultancy services from a GBV Specialist to deliver a general training for field staff and a comprehensive GBV training to protection teams who are providing individual protection assistance, legal counselling, psychosocial support to refugees from nomadic cultural background and those engaged in seasonal agricultural labouring.
