Environmental Impact Assessment of GOAL Syria RESTORE III Programme

Terms of Reference

8.2.1.1 A. Introduction

1. Founded in 1977 in Ireland, GOAL is an international humanitarian agency which currently works in 13 countries. GOAL has been working in Northwest Syria (NWS) for eleven years, focusing its efforts on Water, Sanitation and Hygiene (WASH), Shelter, Food Security and Livelihoods (FSL), Nutrition, and Emergency Response interventions.
 2. GOAL Syria is implementing a large multi-sector programme (RESTORE III) in NWS. The RESTORE III addresses the multiple vulnerabilities that households and communities are facing after eleven years of conflict. At the household level, the programme design creates links between its multi-donor funded emergency response program to its food security, winterization, and shelter programming, and complements food assistance programming with basic needs assistance via Multi-Purpose Cash Assistance (MPCA). At the community level, GOAL runs a bakery programme, which provides affordable bread to large catchment areas. GOAL has a large-scale WASH infrastructure support programme that provides water throughout large areas of Idleb governorate.
 3. GOAL Syria recognizes that mainstreaming environmental considerations into its programme strategy, design and implementation of its multisectoral NWS humanitarian response is an essential means for a more environmentally sustainable humanitarian response. At the same time GOAL recognises the challenges in delivering environmentally risk informed programming in fragile environments.
-

8.2.1.2 B. Purpose and Objectives

4. The purpose of the consultancy is to conduct an Environmental Impact Assessment (EIA) of GOAL Syria programmes and to develop a road map for GOAL Syria to roll out environmentally risk-informed programming in NWS, specifically for the Food Security (Bakery Support), Shelter, Settlements & Infrastructure, WASH, Nutrition, Early Recovery and Livelihoods sectors. This road map will guide GOAL Syria towards achieving the following outcomes:
 - a. GOAL Syria programme interventions are environmentally risk informed based on an integrated risk analysis and planning that is context driven and conflict sensitive; ensuring risks and vulnerabilities are not exacerbated but mitigated as much as possible.
 - b. Cross cutting issues are considered, including sustainable supply chains with optimized logistics, and Cash and Voucher Assistance (CVA) ensuring environmental efficiency.
 - c. Environmental prevention, mitigation and adaptation considerations are integrated across the project cycle.
 - d. Monitoring of environmental risks and implementation of mitigation strategies are mainstreamed across M&E plans and routine M&E activities, including those implemented by the programme and support teams.
 - e. Lessons learned are captured and utilized.

5. The roadmap will be key to mainstreaming environmental considerations into GOAL's NWS humanitarian programme design, implementation and monitoring plans, ultimately aimed at mitigating and reducing the environmental footprint of its response. Although the environmental assessment will be conducted during the implementation of RESTORE III, findings and recommendations will inform adjustments to ongoing programme implementation where feasible and modifications to future programmes.
6. The consultancy will also integrate the following cross-cutting issues as part of the evaluation design and recommendations:
 - i. Sustainable supply chains with optimised logistics.
 - ii. Environmentally risk-informed programming is implemented through a protection and gender lens.
 - iii. CVA ensures environmental efficiency.

The specific objectives of the consultancy are the following:

- a. To understand the main **negative and positive environmental impacts** of current GOAL Syria programming in Food Security (including Bakery Support), Shelter, Settlements & Infrastructure, WASH, Nutrition, Early Recovery and Livelihoods sectors across the different operational settings (rural, peri-urban, urban, and camp settings) in GOAL areas of operation and offices.
- b. To understand what extent GOAL Syria projects **meet donor project level minimum environmental requirements and climate smart good practices**, where the gaps are, and where exemptions to environmental requirements may be applicable due to context specific conditions, unstable high-risk geographic areas.
- c. To understand where negative environmental impacts cannot be avoided, what mitigation measures can be implemented by GOAL.
- b. How can GOAL Syria effectively set targets, indicators and a monitoring plan to monitor adherence to mitigation measures' project environmental footprints, including the types of monitoring activities required, and technical support.
- c. To identify the groups that are negatively impacted by the programme and those that are positively impacted.
7. In addition to this analysis, the consultant will be expected to make recommendations that reflect existing good practices in the areas of greening humanitarian aid that include costings that may be associated with greening recommendations aimed at reducing and mitigating the environmental footprint of GOAL Syria's NWS humanitarian response. The consultant will also develop Monitoring and Evaluation (M&E) tools and guidelines for rollout of *GOAL's greening innovation* that can be used by the programme and programme quality teams in the design and implementation of its NWS humanitarian response, including the development of integrated environmental risk analysis and planning methodologies.

8.2.1.3 C. Scope of Work

8. The consultant will conduct a thorough environmental evaluation of GOAL Syria's current programmes to complete its objectives.

L. Methodology

18. A recommended methodology is outlined below according to the steps to undergo EIAs but the final methodology and tools to be used is to be determined by the consultant in coordination with GOAL.

- a. **Screening:** to determine the projects, sectors and activities requiring an EIA – GOAL has already determined the need to conduct an EIA and therefore no further action is needed on this point.
- b. **Scoping:** to identify the questions to be addressed in the assessment process and the scope of the EIA, geographical areas, population and timeline. GOAL has included guidance in this TOR on the main areas of focus, however, the consultant is encouraged to expand on those in their technical proposals. This stage will include the inception phase of the consultancy.

The Inception Phase will take approximately **two months** and will include:

- Inception meeting with GOAL to agree on a work schedule for tool development and, identify key stakeholder respondents and participants, and agree on timeframes, identify key focal points' roles and communication channels for GOAL and the consultant both in Syria and at Country Office level.
- Initial desk review by the consultant of key internal and external documents. Documents provided by call may include but not limited to:
 - Programme Proposal and logframe
 - Periodic monitoring and donor reports

- Sector specific activity reports
 - Internal pilot environmental assessment report and findings
 - Other documents as needed
- Data collection tools submitted to GOAL for review and feedback (consultant to plan for a minimum of two rounds of review by GOAL). Consultant to finalise data collection tools. Inception report with final versions of data collection tools to be submitted to GOAL.
 - Submit a work plan and schedule for data collection and delivery of key report deliverables in coordination with GOAL.

c. Assessment

- i. Carry out data collection through key informant interviews, focus group discussions and observation. Conduct analysis and capture findings.
- ii. Regular meetings with GOAL representatives.

d. EIA Report and Decision Making

- iii. Submit first draft of evaluation report and environmental road map and collate GOAL feedback (consultant to plan for a minimum of two rounds of review by GOAL).
- iv. Finalise report and road map and submit to GOAL.
- v. Presentation of findings to GOAL staff and senior management.

19. The consultant's field staff are fully responsible for carrying out scheduled data collection activities in coordination with GOAL field staff ensuring timely sharing of data collection schedules and advance communication of necessary support.
20. Due to the volatility of the operational NWS environment data collection may need to be paused or suspended, and itineraries changed to ensure the safety of the consultant field enumerators. This could slow down the rate of data collection. GOAL's communication and transport team in Syria can be consulted for advice about any access restrictions that may happen before and during the consultancy period.
21. A distance-based approach may be required as the consultant might not be able to access GOAL areas of operation in Syria directly due to the security situation or COVID-19 outbreaks. A skilled local team with experience in remote management and Syrian context will be key factor to mitigate this challenge.
22. Due to the COVID-19 context, significant mitigation methods need to be employed, and the consultant will have to employ alternative methods to ensure the continuation of data collection, keeping in mind that the safety of GOAL staff and consultant teams are paramount.

M. Ethical Considerations & Data Protection

23. The consultant will obtain informed consent from all evaluation participants, and ensure all participation is voluntary. The consultant will make clear to all participants that they are under no obligation to participate in interviews and focus group discussions.
24. The consultant will be required to sign a Non-Disclosure/Confidentiality Agreement upon signing a contract with GOAL.
25. The consultant will ensure prior permission is obtained from evaluation participants for taking and use of photographs/moving images for specific purposes, i.e., for findings report and presentations. Furthermore, all identifying information of evaluation participants must remain confidential. It is the responsibility of the contracted consultant to anonymize all datasets or raw data and ensure that identifying personal information is not shared with GOAL staff nor any external party.

26. The consultant will ensure that the preservation of respondent's anonymity and confidentiality is prioritized during data collection, management, storage, and reporting. Respondent data will not be shared with third parties without prior consent from GOAL. The consultant is expected to have clear data protection protocols and policies that should be shared with GOAL during the tender process and inception phase.

N. Assumptions and Requirements

27. The consultant team will have access to GOAL's areas of operation and members of the affected population to conduct data collection.
28. The consultant team will have access to all necessary documentation and can take part in relevant meetings with GOAL staff remotely as required.
29. The consultant will have access to key staff in GOAL offices in Syria, Jordan and Turkey as necessary either remotely or in person.
30. The consultant will be aware of the risks of conducting data collection within Syria, especially that the circumstances in the geographic areas are frequently changing due to insecurity.
31. The consultant will ensure adherence to data protection protocols.
32. Security concerns and COVID-19 could impact the timing and the scope of the evaluation. It is important for the consultant to remain flexible. They must be open to making changes to the schedule and itinerary such as visiting alternate sites, conducting remote reviews and interviews, etc.
33. The consultant will be required to provide their own accommodation, food, and transportation during field visits, as GOAL will NOT be able to provide this type of support.

O. Point of Contact
