Who We Are

[Building Markets](#) unleashes the transformational power of small businesses to address pressing social challenges by driving job creation and inclusive growth.

Global challenges we face today—poverty, inequality, climate change, environmental degradation, and injustice—cannot be solved without the involvement of the private sector. Solutions will require transformation in the form of new business models, new innovation, and new technology. This opens up exciting opportunities for small businesses around the world, which represent 90% of businesses and more than 50% of employment worldwide, to play an important role in creating positive social impact by driving job creation and inclusive growth, particularly for the economically vulnerable.

Building Markets develops trusted relationships with entrepreneurs and uses a data-driven approach to strengthen the capacity of small businesses to contribute to local marketplaces through end-to-end services. Our primary model has three pillars:

- **FIND.** We build better market information by verifying small businesses through in-depth surveys and publishing searchable business profiles and research reports.
- **BUILD.** We enhance the commercial and digital capacity of small businesses through training and advisory services, helping them compete in a global marketplace.
- **CONNECT.** We improve market efficiency through tender distribution services, matchmaking services, and events that enable small businesses to access new buyers, customers, and capital.

Utilizing this model in Türkiye since 2018, Building Markets provides a suite of services that support refugee and host community businesses. To date, we have created a [Business Directory](#) of +2,500 SMEs, distributed and published +3,700 opportunities on our [Tenders Directory](#), and [trained](#) or mentored 940 SMEs. [Market research](#) products published by Building Markets create an evidence base to better understand the economic contributions of refugees, and identify opportunities to promote social cohesion through economic development in Türkiye. Businesses participating in Building Markets activities have won over US \$28 million in new business opportunities, which has helped them to create or maintain over 3,000 full-time equivalent jobs across Türkiye, contributing to the household income of over 6,000 families.

Requirement

Building Markets seeks an expert to conduct an IT diagnostic to identify functionality and security of current IT infrastructure, and generate an actionable plan to manage, maintain and upgrade IT infrastructure.

Building Markets seeks an IT expert to provide

- 1) A diagnostic of IT stack, sites, tools
- 2) A plan to manage, maintain and upgrade IT infrastructure, which will be embedded into the organization's IT strategy
- 3) Support to develop an IT knowledge base
- 4) Provide a brief on IT Capability to support implementation of IT plan and strategy, including pricing

The review should also identify efficient processes for management, maintenance, integration, while reducing duplication. In addition, the review will make recommendations regarding streamlining of IT resources, develop a hosting strategy, maintenance and upgrade schedule. The selected provider will also provide technical support in planning enhancements and

upgrades that support the organization’s strategic programming objectives. The diagnostic should include recommendations on IT policies that the organization should put in place, based on leading practices for similar organizations.

The resulting plan will include recommendations regarding:

- Maintenance, development, improvement, redesign of current systems in terms of features, Automation, integration, and UI/UX. Detailed approach to creating and maintaining APIs across IT stack and websites
- Pathway to develop industry-leading digital tools to support our client requirements
- Analyzing and optimizing Google analytics and Facebook pixel tags data
- Recommendations regarding the development of new directory templates
- Advice on development of a knowledge base, including Step-by-Step Instructions, Flowcharts and videos

The review may be followed by implementation of the resulting plan, as agreed with Building Markets. Detailed pricing and commercial offer should be provided as a deliverable.

Building Markets will provide detailed information about IT systems and tools, as well as access to the tools needed to the selected bidder.

Qualifications

Master’s degree in Software Engineering and proven experience.

1. Expertise in various digital tools, programming types, mobile platforms/app creation, database technology (MySQL), and operating systems.
(WordPress framework - PHP - CSS - Javascript - jQuery - WP Theme development - Rest API - WP Plugin development, Salesforce - Apex - Visualforce, Moodle, Laravel - Symfony)
2. Strong organizational and project management skills.
3. Excellent verbal communication skills in English and Turkish, Arabic and/or Spanish are a plus.
4. Excellent problem-solving skills.
5. Experience providing similar services to international teams/clients

Terms and Conditions

General Terms and Conditions

Building Markets will review all quotes and score them based on the above criteria. Preferred and backup suppliers will be selected, after which a contract will be signed between the parties.

A Firm Fixed Price (FFP)/ Service Agreement/ Consulting Agreement will be awarded as a result of this RFQ.

Under a Service Agreement, the Supplier agrees to a specific cost for a set good or service at the negotiated price. The FWA will thus not be adjusted on the basis of the supplier’s actual costs incurred in performing the contract, which means that the supplier assumes all cost risk of contract performance. The supplier agrees to propose the technical specifications required for this RFQ. Building Markets will issue Purchase Orders indicating the number and extent of the good or service requested from the agreed Service Agreement prices. Building Markets reserves the right not to issue any Purchase Orders despite entering into the Service Agreement.

Building Markets is not bound to accept any quotation, nor award a contract/ Purchase Order, nor be responsible for any costs associated with the preparation and submission of a quotation, regardless of the conduct or outcomes of the selection process.

Building Markets reserves the right to accept or reject any Proposal, to render any or all Proposals as nonresponsive, and to annul the solicitation process and reject all Proposals at any time prior to award of contract, without thereby incurring any liability to the affected supplier, or any obligation to inform the affected supplier(s) of the grounds for Building Markets’ action. Building Markets shall neither be obliged to award the contract to the lowest price offer.

While Building Markets prefers to work with a single supplier, the organization reserves the right to divide the work under this RFQ across multiple service providers. Prospective suppliers are encouraged to highlight areas of relative expertise when submitting their offers.

Conflict of Interest

Building Markets takes special care to comply with transparency, accountability and generally applied work ethics within all domestic and donor regulations, and international laws applicable to the countries where it operates.

Any attempts or suspicion of misconduct to influence the integrity of the procurement process, whether by Building Markets personnel or outside suppliers, will fully be investigated. By submitting your price quotation, you accept to immediately declare any potential conflict of interest, even if cursory or unintentional, upon becoming aware of such for immediate internal review by the organization. Failure to declare such conflicts of interest, even if accidental, may result in litigation.

Non-disclosure Agreement and International Compliance

By submitting your price quotation, you agree that in the event of being selected to undertake this project, any team members involved in the development of said project are willing to sign a non-disclosure agreement to maintain confidentiality of data involved.

You also agree to sign anti-terrorism and anti-fraud declaration forms, and have your name searched against an international database conducting terrorism background checks. There is no additional burden to you as a supplier; only consent is required.

Compliance with personal data protection laws

Building Markets is committed to ensuring the security and protection of the personal information that we process, and to provide a compliant and consistent approach to data protection. If you have any questions related to our personal data protection compliance, please contact our Data Protection Officer (sabarek@buildingmarkets.org) or make a Data Subject Access Request, which can be accessed from our website (www.buildingmarkets.org)

For the purposes of this RFQ, the prospective supplier represents and warrants that it or any of its potential subcontractors are in full compliance with the Law on the Protection of Personal Data numbered 6698 (hereafter referred to as the “KVKK”) and any relevant applicable data protection legislation (hereafter referred to as the “Data Protection Regulations”).

Submission Instructions

To respond to this RFQ, prospective suppliers are required to submit the following documents:
